

Building Tennessee's Tomorrow: Anticipating the State's Infrastructure Needs

July 2003 through June 2008

Table of Contents

EXECUTIVE SUMMARY	i
OVERVIEW	1
Why inventory public infrastructure needs?	2
What infrastructure is included in the inventory?	2
What have we learned about public infrastructure needs?	3
What else needs to be done?	6
INTRODUCTION: BASICS OF THE INFRASTRUCTURE NEEDS INVENTORY	7
Short-Term and Long-Range Planning: Often the One Opportunity for Proactive Thinking	8
Decision Making: Matching Critical Needs to Limited Funding Opportunities	9
A Special Case: Annual Review of Conditions and Needs of Public School Facilities	9
Increased Public Awareness, Better Communication and Collaboration	10
REPORTED INFRASTRUCTURE NEEDS STATEWIDE	11
Total Needs Grow 13% Since Last Report—Transportation Leads, but Economic Development Category Increases 70%	11
Transportation, Education, and Water and Wastewater Continue to Dominate Statewide Needs	15
City Ownership Dominates Four of the Six Major Categories of Need	16
Stage of Development Varies with Type of Project	16
Projects Included in Capital Improvement Programs are Far More Likely to be Under Construction Than Projects That Are Not in Those Planning Documents	19
State or Federal Mandates Affect Only 6% of All Projects but Account for 30% of Elementary and Secondary School Costs	19
FUNDING THE STATE'S INFRASTRUCTURE NEEDS	23
Less Than Half of All Infrastructure Needs in the Current Inventory Are Expected to be Fully Funded	23
Local Revenues Are the Principal Source of Funding for Fully Funded Infrastructure Needs Reported in the Inventory	25

REPORTED PUBLIC SCHOOL FACILITY CONDITIONS AND NEEDS	29
New School Building Needs Level Out; Primary Reason Shifts From EIA to Other Factors	29
Most of Tennessee's Public Schools are in Good or Excellent Condition, but Substantial Upgrade Needs Remain	32
Mandate Costs Continue to Decline; EIA Still Dominates	33
Far More School Systems Report No Technology Needs, but Total Technology Infrastructure Needs More Than Triple Earlier Inventories	35
Total Capital Outlays by Public School Systems Peaked in 2001 and Returned to Their 1999 Level in 2003	35
REPORTED INFRASTRUCTURE NEEDS BY COUNTY	37
Greatest Total Needs Reported for Largest Counties; Greatest Need per Capita Reported Mainly for Small Counties	37
Population Gains Are More Closely Related to Infrastructure Needs Than Population Growth Rates Are	41
Infrastructure Needs Per Capita Are Not Lower in Counties With Higher Population Densities	42
Statistical Analyses Confirm Inferences About Population and Infrastructure Needs; Tax Base Factors Also Play a Role	46
APPENDICES	49
Appendix A: Enabling Legislation	51
Appendix B: Project History	61
Appendix C: Inventory Forms	63
Appendix D: Reported Public Infrastructure Needs by County	71
Appendix E: Public School System Infrastructure Needs by School System	153
Appendix F: TACIR Methodology for Estimated Costs of New Schools Attributable to the Education Improvement Act	189
GLOSSARY OF TERMS	191
TENNESSEE DEVELOPMENT DISTRICTS MAP	197
