Crockett County

At 28th, Crockett County ranks in the top third of Tennessee counties in child well-being. Some of the county's strongest rankings include a low rate of school suspensions and a high school graduation rate that is near the top among Tennessee counties. The county's biggest challenges include a high rate of children without health insurance and of pregnancy among girls age 15 to 17.

Additional strengths include high rates of 3rd to 8th grade children rated proficient in reading and math on TNReady tests and low housing costs.

Additional challenges for Crockett County include a below average median household income and the fact that about 1 in 4 of its children live in poverty.

Policy/Practice/Program Options to Improve Outcomes. Many of these policies have multiple models for delivery, including public-private partnership and non-profit leadership.

- Most uninsured children in Tennessee qualify for either TennCare or CoverKids, so high rates of uninsured children can be improved with outreach to make sure that families are aware of these insurance opportunities. According to Census Bureau estimates, Crockett County has almost 140 children who qualify for these health insurance programs but who nonetheless lack insurance.
- Comprehensive sex education classes that include both encouragement of abstinence and information on birth control have been shown to reduce the number of teen pregnancies.
- With a high rate of child poverty and a relatively low median household income, improving outreach to those who may qualify to receive SNAP, WIC and TennCare benefits to be sure they are aware of these services can help ensure basic needs are met. Additionally, nutrition programs that provide food for school-age children to take home can contribute to food security. Expanding services through Family Resource Centers can also help reach these vulnerable populations.
