TDOT AERONAUTICS ENGINEERING UPDATE

REMINDER: July 27th is the deadline for project requests to be presented during the September 20, 2018 TAC meeting (for requests in excess of \$100,000).

FY 2019 DESIGN

Now is the ideal time to initiate a design grant if construction is desired to start in spring of 2019. If you have a FY 2019 design project on your ACIP, please consider having your request in **BY JULY 27TH**. Your TDOT Aeronautics Project Manager can help with any questions regarding your ACIP.

EVALUATING SCOPE AND FEE

In order to properly evaluate the scope and fee for design services, *WE WILL REQUIRE A PRELIMINARY CONSTRUCTION ESTIMATE*.

- ❖ For complex projects requiring survey or geotechnical work, and 30% level design in order to develop a preliminary construction estimate, you will need to start with a *PRELIMINARY ENGINEERING STUDY* request. Preliminary engineering studies are typically under the threshold requiring TAC approval, and can be amended later for **DESIGN DEVELOPMENT AND BIDDING SERVICES** once a preliminary construction estimate has been developed.

For more on deadlines and meeting dates, please go to <https://www.tn.gov/tdot/aeronautics/planning.html>.

Thank you,

John-Paul Saalwaechter [sawl véktər], P.E. | CE Manager 2
