

CM/GC QUESTION REQUEST FORM D

PROJECT: I40 Bridges over 8th Ave. CONTRACT No.: CMGC10

DATE: 3/31/2025

Number	RFP Section ID	Question	Reserved for Agency Response
QR-1	2.5.3.1 PROJECT TEAM QUALIFICATIONS	In the pre-proposal meeting, it was clarified that the Structural Designer role was intended to be for design peer review/constructability reviews by the CM, please confirm. Please provide any experience, qualification, or licenses/certifications required for the Structural Designer. Is this role required to be an employee of the Proposer, or can it be a third party?	The intent of the “Structural Designer” Key Individual requirement was to ensure that the CM/GC team includes a member capable of providing constructability and phasing input related to structural elements during the preconstruction phase. This role may be filled by the Project and /or the Construction Manager with related experience. A Structural Designer is not a required Key Individual. This clarification will be formally addressed in a forthcoming addendum.
