

I-24 SHELLMOUND BRIDGES

BRIDGE REPLACEMENT PROJECT

PROJECT INFORMATIONAL MEETING

MARION COUNTY

The Tennessee Department of Transportation (TDOT) is proposing to replace two (2) bridges in Marion County: I-24 Westbound bridge over Shellmound Road beginning at log mile 1.29 ending at log mile 1.40; and the Shellmound Road bridge over I-24 Eastbound in Jasper, Tennessee. The design and construction work for the Project will consist of the replacement of both bridges with specific roadway and bridge design criteria.

TDOT will deliver the project utilizing the Design-Build (DB) procurement method. TDOT is holding this informational meeting to present the project scope of work, explain the DB selection process, the DB delivery process, and review the anticipated procurement schedule. Those new to Alternative Delivery will learn how simple it is to participate in TDOT's DB Alternative Delivery program.

This is an excellent opportunity for contractors new to Design Build to get involved and gain valuable Design-Build experience.
