

Congestion Mitigation and Air Quality Improvement (CMAQ) Program

Strategic Air Quality Initiatives: Park and Ride Lots

This initiative will expand opportunities for ridesharing and transit accessibility by adding commuter infrastructure along congested routes.

Park and Ride Lots have the ability to:

- Provide infrastructure for car-pooling/van-pooling;
- Reduce congestion if commuters choose to take advantage of parking opportunities and ride-sharing as a result; and,
- Reduce peak travel demands on major roadways and in urban areas during commuting hours.

Applicants interested in funding new or expanded park and ride facilities will need to provide the following information:

- The need and use for a local park and ride facility
- Potential locations (existing publicly owned land preferred; not required)
- Ability to provide a 20% local match
