PRODUCTION SUPPORT MEMORANDUM NO. 25-06

TDOT 20 Flags Method

Effective immediately, the 20 Flags Intersection Evaluation Guide, Fact Sheets, and Spreadsheet Tool have been developed to support the Project Scoping Guide with pedestrian and bicycle intersection safety evaluation during the project scoping and design phases. They deliver one of the five principles of the Safe System Approach, "Safe Road Users." The method is based on *NCHRP Research Report 948: Guide for Pedestrian and Bicyclists' Safety at Alternative and Other Intersections and Interchanges*, and refined for broader applications, including conventional intersections.

The 20 Flags Guide, Fact Sheets, and Tool can be found on the TDOT's website:
