

**Environmental Division  
2021 On-Call Contracts**

**Outdoor Advertising & Landscape Architecture Services**

**DT-0330 Part II Additional Requirements**

1. In completing Section F of the DT-0330 Part 2:
  - a. Provide up to 5 projects for each of the following categories (for a total of up to 15 projects overall):
    - i. Projects that demonstrate firm's experience in transportation landscaping and community landscaping including context sensitive solutions
    - ii. Projects that demonstrate firm's experience in outdoor advertising control, Scenic Byways, and/or litter control.
    - iii. Projects that demonstrate firm's experience and capabilities using global positioning surveys (GPS) to collect and organize location data and/or in using geographic information spatial (GIS) analysis to provide information and relevant mapping to the client in an easily digestible format. Indicate if any of the information was provided in a public facing format or platform.
  - b. For each example project provided, in addition to the information already requested in the brief description section, also note:
    - i. Any public outreach efforts involved in the project - include the role your firm played in those outreach efforts and describe the various methods of initial outreach, the materials and platforms developed or used, and any other facets of the effort that provided increased efficiency or effectiveness. Please also note how the outreach was tailored to the relevant community and/or situation. Note any lessons learned from the effort.
    - ii. Any coordination with local, state, or federal officials or agencies (include the structure and nature of that coordination)
    - iii. Any additional research or work related to policy development or rulemaking that supported the project or a program, (e.g. legislative research)
2. Please indicate staff knowledge of horticultural best practices, native landscapes, and urban forestry.
