

Forward

The Tennessee Department of Transportation (TDOT) Geotechnical Guidelines are currently being updated on a section-by-section basis. As each section is completed, it will be published on the TDOT Materials and Tests website within the Geotechnical Operations section to provide timely access to the most current guidance. Because this is an ongoing process, some topics may not yet be reflected in the updated sections. If specific information is needed and is not included in the sections released to date, please refer to the October 2023 edition of the Geotechnical Guidelines for additional guidance.
