February 17, 2026

(Materials & Tests Division)

Unstable Slope Management Program (USMP), services” On-Call

Responses to questions/comments

February 27, 2026

Q1: How many sites/locations are part of the program, currently?

A1: There are approximately 3,700 active sites/locations within the program. This number continues to increase as additional landslide sites are identified.

Q2: Historically, how many of the site evaluations become design projects?

A2: . All projects included in TDOT’s 3-Year Unstable Slope Program originate from site evaluations.

Q3: Historically, how many emergency response events occur annually?

A3: Emergency response needs are variable. On average, we see 2–3 events per year, though this number can increase significantly during years with severe or widespread weather events.
