

Project Facts

Bid Letting
June 2026

Estimated Project Start
August/September 2026

Contract Completion (Estimated)
Summer 2030

Project Features

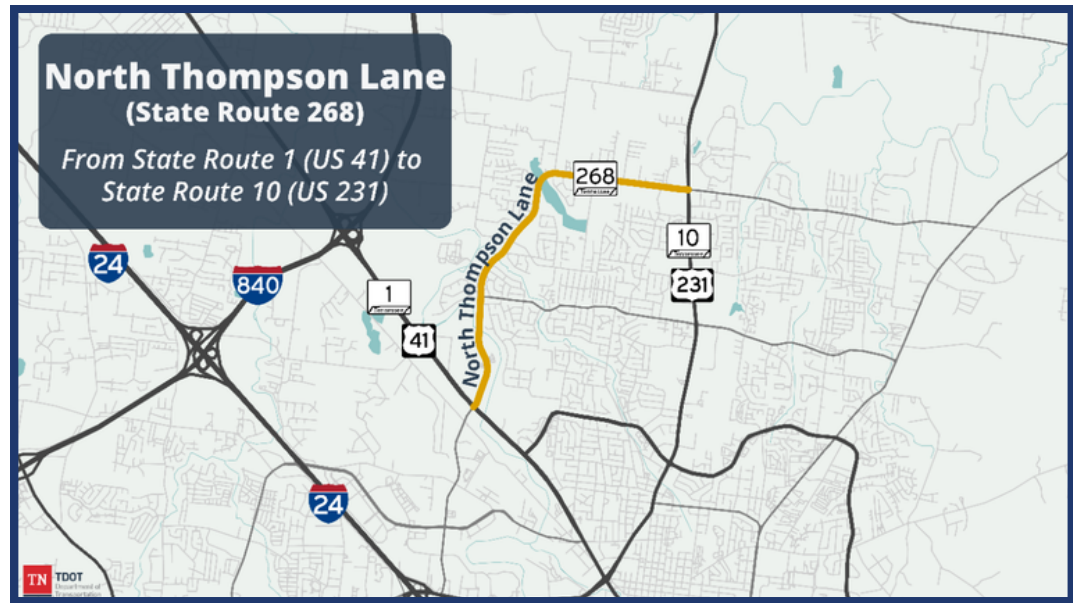

- Widening to a 5-lane facility
- Bridge replacement over West Fork Stones River
- Shared-use path near bridge over West Fork Stones River to near Memorial Blvd
- Sidewalks
- 4 signal upgrades
- 3 signal additions
- Pedestrian Hybrid Beacon (PHB)

N. Thompson Lane (SR 268)

Widening

Rutherford County

Project Overview

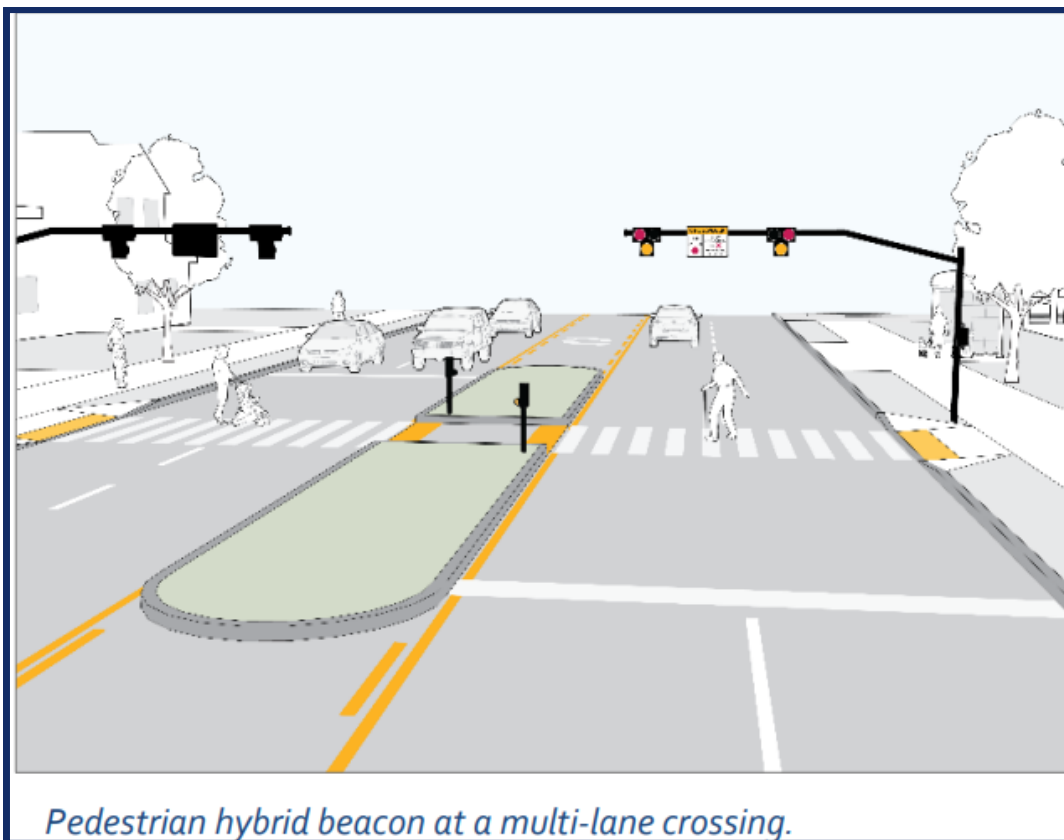

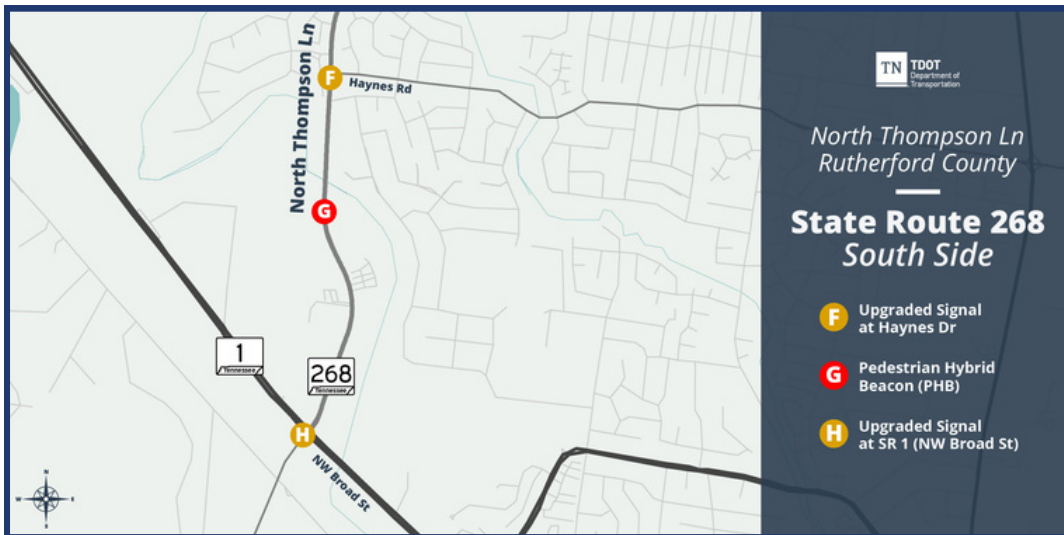

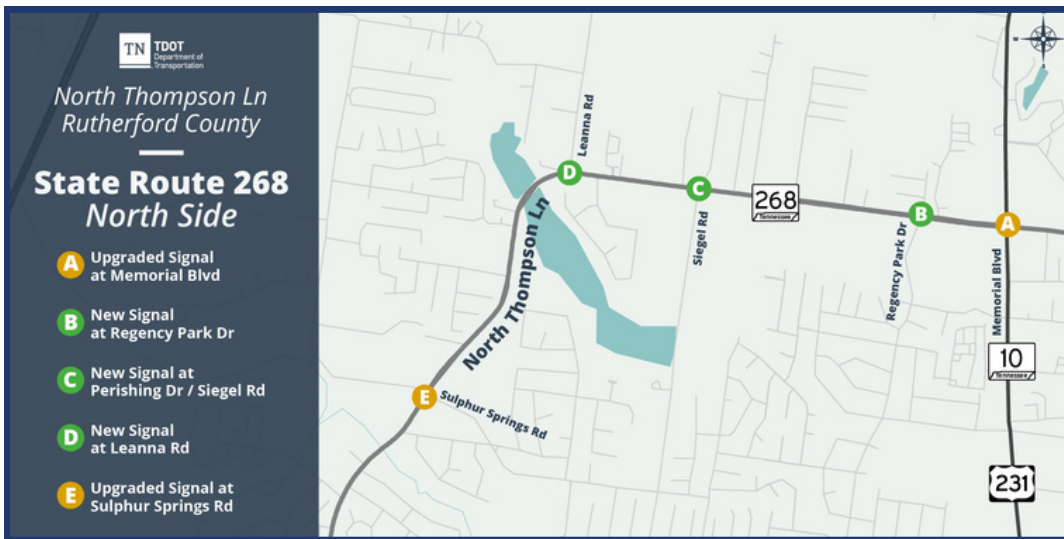

The Tennessee Department of Transportation (TDOT), in cooperation with the Federal Highway Administration (FHWA), will construct widening improvements to approximately 4.3 miles of North Thompson Lane (State Route 268) from State Route 1 (Northwest Broad Street) to State Route 10 (Memorial Boulevard).

The primary needs along North Thompson Lane are to increase vehicular capacity and to improve safety. The existing two-lane arterial is deficient in its capacity to provide an acceptable level of service. The improved facility will better meet current and future projected traffic volumes.

The project will also replace the existing bridge structure over West Fork Stones River to meet current bridge standards. As part of these improvements, four existing signals will be upgraded and three additional signals will be installed to further enhance safety, traffic flow, and operational efficiency along the corridor.
