EROSION CONTROL BLANKET SLOPE INSTALLATION GENERAL NOTES

1. Erosion control blankets are intended to be used as an immediate cover for disturbed slopes that have been temporarily or permanently graded.

2. Erosion control blankets may also be used as channel covers, where the anticipated maximum flow stress is low, refer to EC-STR-36 for installation details.

3. Erosion control blankets shall be installed according to manufacturers specifications. When not available, install according to notes A thru J.

4. Erosion control blankets shall be used to stabilize slopes prepared to a smooth profile and relatively free from all hard rocks, stones, roots,伊利, and crusting. Fill any voids and make sure the slope is compacted properly.

5. Erosion control blankets may be applied to a maximum of 1.0 inch of flow stress. When not available, install according to notes D thru J.

6. Erosion control blankets shall be used to stabilize slopes prepared to a smooth profile and relatively free from all hard rocks, stones, roots,伊利, and crusting. Fill any voids and make sure the slope is compacted properly.

7. Erosion control blankets shall be installed according to manufacturers specifications. When not available, install according to notes A thru J.

8. Erosion control blankets are intended to be used as an immediate cover for disturbed slopes that have been temporarily or permanently graded.

9. Erosion control blankets may also be used as channel covers, where the anticipated maximum flow stress is low, refer to EC-STR-36 for installation details.

10. Erosion control blankets shall be installed according to manufacturers specifications. When not available, install according to notes A thru J.

11. Erosion control blankets shall be used to stabilize slopes prepared to a smooth profile and relatively free from all hard rocks, stones, roots,伊利, and crusting. Fill any voids and make sure the slope is compacted properly.

12. Erosion control blankets may be applied to a maximum of 1.0 inch of flow stress. When not available, install according to notes D thru J.

13. Erosion control blankets shall be used to stabilize slopes prepared to a smooth profile and relatively free from all hard rocks, stones, roots,伊利, and crusting. Fill any voids and make sure the slope is compacted properly.

14. Erosion control blankets shall be installed according to manufacturers specifications. When not available, install according to notes A thru J.

15. Erosion control blankets are intended to be used as an immediate cover for disturbed slopes that have been temporarily or permanently graded.

16. Erosion control blankets may also be used as channel covers, where the anticipated maximum flow stress is low, refer to EC-STR-36 for installation details.

17. Erosion control blankets shall be installed according to manufacturers specifications. When not available, install according to notes A thru J.

18. Erosion control blankets shall be used to stabilize slopes prepared to a smooth profile and relatively free from all hard rocks, stones, roots,伊利, and crusting. Fill any voids and make sure the slope is compacted properly.

19. Erosion control blankets may be applied to a maximum of 1.0 inch of flow stress. When not available, install according to notes D thru J.

20. Erosion control blankets shall be used to stabilize slopes prepared to a smooth profile and relatively free from all hard rocks, stones, roots,伊利, and crusting. Fill any voids and make sure the slope is compacted properly.

21. Erosion control blankets shall be installed according to manufacturers specifications. When not available, install according to notes A thru J.

22. Erosion control blankets are intended to be used as an immediate cover for disturbed slopes that have been temporarily or permanently graded.

23. Erosion control blankets may also be used as channel covers, where the anticipated maximum flow stress is low, refer to EC-STR-36 for installation details.

24. Erosion control blankets shall be installed according to manufacturers specifications. When not available, install according to notes A thru J.

25. Erosion control blankets shall be used to stabilize slopes prepared to a smooth profile and relatively free from all hard rocks, stones, roots,伊利, and crusting. Fill any voids and make sure the slope is compacted properly.

26. Erosion control blankets may be applied to a maximum of 1.0 inch of flow stress. When not available, install according to notes D thru J.

27. Erosion control blankets shall be used to stabilize slopes prepared to a smooth profile and relatively free from all hard rocks, stones, roots,伊利, and crusting. Fill any voids and make sure the slope is compacted properly.

28. Erosion control blankets shall be installed according to manufacturers specifications. When not available, install according to notes A thru J.

29. Erosion control blankets are intended to be used as an immediate cover for disturbed slopes that have been temporarily or permanently graded.

30. Erosion control blankets may also be used as channel covers, where the anticipated maximum flow stress is low, refer to EC-STR-36 for installation details.

31. Erosion control blankets shall be installed according to manufacturers specifications. When not available, install according to notes A thru J.

32. Erosion control blankets shall be used to stabilize slopes prepared to a smooth profile and relatively free from all hard rocks, stones, roots,伊利, and crusting. Fill any voids and make sure the slope is compacted properly.

33. Erosion control blankets may be applied to a maximum of 1.0 inch of flow stress. When not available, install according to notes D thru J.

34. Erosion control blankets shall be used to stabilize slopes prepared to a smooth profile and relatively free from all hard rocks, stones, roots,伊利, and crusting. Fill any voids and make sure the slope is compacted properly.
