Survey Manual

Issued by the Design Division
Third Edition

May 3, 2011

FOREWORD

This Manual establishes uniform policies and procedures for surveys within the Tennessee Department of Transportation. A legal standard for surveys is not established or intended. It is published solely for information, guidance, and training of the Department's employees and consultants.

The Manual does not establish any legal or administrative interpretations of the Department's contracts. In the event that the terms of a contract and the Manual are in conflict, the Manual is subordinate to the contract.
