

TRAFFIC DESIGN MANUAL

**Traffic Operations Division
Traffic Engineering Office**

June 2020

[This page intentionally left blank.]

TABLE OF CONTENTS

Table of Contents	iii
List of Figures	xii
List of Tables	xv
List of Equations	xvii
Appendices.....	xvii
Chapter 1: Introduction	1-1
1.1 About this Manual.....	1-1
1.2 Standard Abbreviations	1-2
1.3 Standard References.....	1-4
1.4 Traffic Control Devices	1-5
1.5 Design of Traffic Control Devices.....	1-6
1.6 TDOT Traffic Operations Division, Traffic Engineering Office	1-6
1.7 Governing Laws, Rules and Regulations	1-6
Chapter 2: Traffic Impact Studies	2-1
2.1 General Information	2-1
2.1.1 Purpose	2-2
2.1.2 Applicability	2-2
2.1.3 Prequalified Engineering Firms and Preparer Qualifications.....	2-2
2.2 Traffic Impact Study Parameters.....	2-2
2.2.1 Proposed Development Trip Calculations	2-2
2.2.2 Traffic Impact Study Screening Evaluation Form.....	2-3
2.2.3 Minimum Threshold Levels	2-3
2.2.4 Traffic Impact Study Levels	2-4
2.2.5 Waiver	2-4
2.2.6 Target / Horizon Year.....	2-4
2.2.7 Time Periods.....	2-4
2.2.8 Traffic Impact Study Scoping Meeting.....	2-5
2.3 Development of Traffic Conditions	2-6
2.3.1 Existing Traffic Conditions.....	2-6
2.3.2 Background Traffic Development and Growth Calculations.....	2-6

TABLE OF CONTENTS (CONT.)

2.3.3 Future Traffic Conditions without Project.....2-6

2.3.4 Site Traffic Conditions2-7

2.3.5 Future Traffic Conditions with Project.....2-7

2.4 Traffic Impact Study Analyses and Mitigation Measures2-8

 2.4.1 Capacity Analyses2-8

 2.4.2 Level of Service (LOS) Goals.....2-10

 2.4.3 Queuing Analyses.....2-11

 2.4.4 Mitigation Measures.....2-11

2.5 Traffic Impact Study Report Format.....2-13

 2.5.1 General Information2-13

 2.5.2 Title Page.....2-13

 2.5.3 Table of Contents.....2-13

 2.5.4 Executive Summary2-13

 2.5.5 Introduction2-14

 2.5.6 Study Analysis Considerations.....2-14

 2.5.7 Existing Traffic Conditions.....2-14

 2.5.8 Background Traffic Development and Growth Calculations.....2-15

 2.5.9 Future Traffic Conditions without Project.....2-15

 2.5.10 Site Traffic Conditions2-15

 2.5.11 Future Traffic Conditions with Project.....2-15

 2.5.12 Summary of Findings2-16

 2.5.13 Recommendations2-16

 2.5.14 Submittal Requirements.....2-16

Chapter 3: TDOT Project Development3-1

 3.1 Project Schedule3-1

 3.2 Plans Development Responsibilities3-1

 3.2.1 TDOT Design Manager3-1

 3.2.2 Local Agency3-1

 3.2.3 Design Engineer3-1

 3.3 Plan Development Stages3-2

 3.4 Support Projects3-5

 3.5 Conformance to TDOT Plans Format3-5

TABLE OF CONTENTS (CONT.)

Chapter 4: Justifying the Need for Traffic Signals4-1

- 4.1 Justification for Traffic Signal Control.....4-1
 - 4.1.1 Engineering Study Data Collection.....4-1
 - 4.1.2 Traffic Signal Warrants.....4-11
- 4.2 Authorization for Installation and Ownership of Traffic Signal Control4-13
 - 4.2.1 Additional Requirements4-14

Chapter 5: Traffic Signal Design – General Information5-1

- 5.1 General Information5-1
- 5.2 Site Reviews.....5-2
- 5.3 Proprietary Equipment for Traffic Signal Systems.....5-3
 - 5.3.1 Necessary for Synchronization with Existing Facilities5-3
 - 5.3.2 Unique Product for which there is No Equally Suitable Alternative5-3
 - 5.3.3 Experimental Products5-4

Chapter 6: Traffic Signal Design – Cabinets and Equipment6-1

- 6.1 Traffic Signal Cabinet.....6-1
- 6.2 Traffic Signal Controllers6-2
- 6.3 Traffic Signal Detector Cards6-2
- 6.4 Traffic Signal Load Switches and Flasher6-2
- 6.5 Traffic Signal Monitor6-2
- 6.6 Traffic Signal Power Supply6-3

Chapter 7: Traffic Signal Design – Operations and Coordination.....7-1

- 7.1 Traffic Signal Operation Basic Concepts.....7-1
 - 7.1.1 Traffic Signal Movements.....7-1
 - 7.1.2 Traffic Signal Phases7-1
 - 7.1.3 Ring-and-Barrier Diagrams7-5
- 7.2 Traffic Signal Modes of Operation.....7-5
 - 7.2.1 Pre-timed (Fixed Time) Operation.....7-5
 - 7.2.2 Actuated Operation7-8
 - 7.2.3 Coordinated Operation.....7-8

TABLE OF CONTENTS (CONT.)

7.2.4 Volume-Density Operation7-9

7.2.5 Traffic Responsive Operation.....7-9

7.2.6 Adaptive Signal Control Technology Operation7-9

7.2.7 Traffic Signal Preemption.....7-9

7.2.8 Traffic Signal Priority.....7-9

7.2.9 Flashing Mode Operation.....7-10

7.3 Traffic Signal Phasing.....7-10

7.3.1 Need for Left-Turn Phasing.....7-10

7.3.2 Types of Left-Turn Phasing.....7-13

7.3.3 Guidelines for Selecting Left-Turn Phasing7-16

7.3.4 Sequence of Left-Turn Phasing.....7-18

7.3.5 Flashing Yellow Arrow for Left-Turn Movement Phasing7-23

7.3.6 Right-Turn Treatments.....7-26

7.4 Pedestrian Signal Phasing.....7-31

7.4.1 Pedestrian Warrants and Signal Heads.....7-31

7.4.2 Pedestrian Signal Phasing Alternatives.....7-31

7.5 Traffic Signal Timing7-33

7.5.1 TDOT’s Role7-33

7.5.2 Traffic Signal Timing Considerations.....7-33

7.5.3 Data Collection.....7-34

7.5.4 Operational Objectives.....7-35

7.5.5 Yellow Change Interval and Red Clearance Interval7-36

7.5.6 Pedestrian Signal Timing Parameters7-41

7.5.7 Pre-timed (Fixed Time) Operation Signal Timing Parameters7-44

7.5.8 Actuated Operation Signal Timing Parameters.....7-47

7.6 Traffic Signal Coordination.....7-53

7.6.1 Traffic Signal Coordination Objectives7-53

7.6.2 Fundamentals of Traffic Signal Coordination.....7-53

7.6.3 Traffic Signal Coordination Parameters Guidelines7-56

7.6.4 Traffic Signal Coordination Complexities.....7-60

TABLE OF CONTENTS (CONT.)

7.7 Traffic Signal Timing Plans7-62

 7.7.1 Timing Software7-62

7.8 Advanced Traffic Signal Operations.....7-63

 7.8.1 Volume Density7-63

 7.8.2 Traffic Responsive Plan Selection Systems7-69

 7.8.3 Adaptive Signal Control Technology Systems7-69

7.9 Traffic Signal Priority7-70

7.10 Traffic Signal Preemption7-71

 7.10.1 Emergency Vehicle Preemption7-71

 7.10.2 Railroad Preemption7-75

 7.10.3 Multiple Preemption7-80

7.11 Flashing Operations.....7-80

 7.11.1 Types of Flashing Operation7-80

 7.11.2 Flashing Operation Signal Display7-81

Chapter 8: Traffic Signal Design – Detection.....8-1

 8.1 Detection8-1

 8.1.1 Detection Objectives8-1

 8.1.2 Detection Location8-1

 8.2 Detection Parameters.....8-2

 8.2.1 Detection Operating Modes.....8-2

 8.2.2 Detection Memory Modes8-2

 8.2.3 Detection Modifiers8-3

 8.3 Phase Recalls8-5

 8.3.1 Minimum Recall8-5

 8.3.2 Maximum Recall8-5

 8.3.3 Soft Recall8-5

 8.3.4 Pedestrian Recall.....8-5

 8.4 Detection Design for Approaches Below 35 MPH.....8-7

TABLE OF CONTENTS (CONT.)

8.5 Detection Design for Approaches 35 MPH or Above8-9

 8.5.1 Timing of the Yellow Change Interval.....8-9

 8.5.2 Driver Behavior8-9

8.6 Detection Design for Coordinated Systems8-12

8.7 Pedestrian Detection8-12

 8.7.1 Accessible Pedestrian Signals8-12

8.8 Types of Detection8-13

 8.8.1 Inductive Loop Detection.....8-13

 8.8.2 Video Detection.....8-16

 8.8.3 Radar Detection8-16

Chapter 9: Traffic Signal Design – Supports and Signal Heads.....9-1

 9.1 Traffic Signal Supports9-1

 9.1.1 Traffic Signal Strain Poles9-1

 9.1.2 Traffic Signal Mast Arm Poles9-5

 9.2 Traffic Signal Indications.....9-9

 9.2.1 Lens Size, Illumination and Shielding.....9-9

 9.2.2 Traffic Signal Housing9-9

 9.2.3 Traffic Signal Backplates.....9-9

 9.2.4 Strobe Lights.....9-9

 9.2.5 Countdown Displays9-9

 9.2.6 Number of Signal Faces and Arrangement on an Approach.....9-10

 9.2.7 Visibility of Signal Faces on an Approach.....9-10

 9.2.8 Mounting Height of Signal Faces.....9-11

 9.2.9 Lateral and Longitudinal Positioning of Signal Faces9-12

 9.2.10 Shared and Separate Signal Faces.....9-12

 9.2.11 Signal Head Visors.....9-14

 9.2.12 Visibility-Limited Traffic Signal Devices9-16

 9.2.13 Use of Signs at Signalized Intersections9-18

 9.2.14 Use of Stop Signs at Signalized Intersections9-18

 9.2.15 Pedestrian Signal Indications9-19

TABLE OF CONTENTS (CONT.)

Chapter 10: Traffic Signal Design – Pull Boxes, Conduits, and Wiring 10-1

10.1 Pull Boxes10-1

 10.1.1 Type/Size/Use of Pull Boxes10-1

 10.1.2 Spacing of Pull Boxes10-1

 10.1.3 Pull Box Material10-1

10.2 Traffic Signal Conduits.....10-2

 10.2.1 Conduit Material Type10-2

 10.2.2 Conduit Installation Methods10-2

 10.2.3 Depth Installed Underground10-3

 10.2.4 Conduit Sizing.....10-3

 10.2.5 Communications Cable Conduit.....10-4

 10.2.6 Power Cable Conduit10-4

 10.2.7 Jacked and Bored Conduit.....10-4

 10.2.8 Conduit Radii10-4

 10.2.9 Spare Conduit.....10-4

 10.2.10 Conduit for Road Widening Projects.....10-4

10.3 Traffic Signal Wiring.....10-5

 10.3.1 Signal Control Cable10-5

 10.3.2 Inductive Loop Wire10-5

 10.3.3 Loop Detector Lead-In Cable Wire10-5

 10.3.4 Preformed Loop Detector Wire.....10-5

 10.3.5 Coordinated Systems Communications.....10-5

 10.3.6 Cable Lashing10-6

 10.3.7 Cable/Wire Sizing and Measurements10-6

TABLE OF CONTENTS (CONT.)

Chapter 11: Traffic Signal Design – Miscellaneous Information 11-1

11.1 Signal Control for Driveways within Signalized Intersections 11-1

11.2 Utilities 11-1

11.3 Street Lighting on Traffic Signal Supports at Intersections 11-3

 11.3.1 Street Light Support Design 11-3

 11.3.2 Luminaire Mounting Height 11-3

 11.3.3 Wiring Requirements 11-3

11.4 Traffic Signal Installation Inspection Guidelines 11-4

 11.4.1 Responsibilities of the Inspector 11-4

 11.4.2 Preconstruction Activities 11-4

 11.4.3 Sampling and Testing of Materials 11-5

 11.4.4 General Principles 11-5

 11.4.5 Inspection Activities 11-5

 11.4.6 Final Acceptance and Notification 11-6

11.5 Traffic Signal Activation Procedures 11-7

Chapter 12: Traffic Signal Design – Post-Installation 12-1

12.1 Traffic Signal Maintenance Guidelines 12-1

 12.1.1 Reducing Agency Exposure to Liability 12-1

 12.1.2 Preventive Maintenance 12-2

 12.1.3 Response Maintenance 12-5

12.2 Automated Traffic Signal Performance Measures 12-6

12.3 Removal of Traffic Signals 12-10

Chapter 13: Other Types of Traffic Signals 13-1

13.1 Highway Traffic Signals 13-1

13.2 Pedestrian Hybrid Beacons 13-2

13.3 Emergency-Vehicle Traffic Control Signals 13-3

 13.3.1 Displays 13-3

 13.3.2 Control 13-3

 13.3.3 Signing 13-3

TABLE OF CONTENTS (CONT.)

13.4 Flashing Beacons 13-5

 13.4.1 Intersection Control Beacons 13-5

 13.4.2 Stop Sign Beacons..... 13-5

 13.4.3 Speed Limit Sign Beacons 13-5

 13.4.4 School Zone Speed Limit Sign Beacons 13-7

 13.4.5 Warning Sign Beacons..... 13-7

 13.4.6 Traffic Signal Ahead Beacons 13-7

Chapter 14: Signing and Pavement Markings..... 14-1

 14.1 General Information 14-1

 14.2 Signing 14-1

 14.2.1 MUTCD 14-2

 14.2.2 Application 14-2

 14.2.3 Sign Layouts 14-2

 14.2.4 Conventional Highways (Non-Access Controlled) Signs 14-2

 14.2.5 Freeway and Expressway Signs (Access Controlled)..... 14-29

 14.2.6 Sign Vertical Clearances 14-31

 14.2.7 Traffic Signal Signs 14-32

 14.2.8 Other Traffic Control Signs 14-37

 14.2.9 Proposed Overhead Street Name Sign Layouts 14-38

 14.3 Pavement Markings 14-39

 14.3.1 Stop Lines 14-39

 14.3.2 Yield Lines 14-42

 14.3.3 Crosswalks 14-43

 14.3.4 Turn Arrows 14-44

 14.3.5 Materials 14-44

TABLE OF CONTENTS (CONT.)

Chapter 15: Roadway and Intersection Lighting 15-1

- 15.1 General Information 15-1
 - 15.1.1 Need for Engineering Expertise..... 15-1
 - 15.1.2 Priorities and Funding Guidelines..... 15-2
- 15.2 Analyzing Highway Lighting Needs 15-4
 - 15.2.1 Freeways 15-4
 - 15.2.2 Streets and Highways Other Than Freeways 15-8
 - 15.2.3 Other Locations..... 15-13
- 15.3 New Lighting Projects 15-15
 - 15.3.1 Lighting Design Process 15-15
 - 15.3.2 Lighting Design Process Overview 15-16
 - 15.3.3 Design Considerations 15-18
 - 15.3.4 Determine Classifications..... 15-18
 - 15.3.5 Roadside Safety Considerations 15-30
 - 15.3.6 Other Design Considerations 15-30
- 15.4 Lighting Design Criteria, Policies, and Procedures..... 15-33
 - 15.4.1 Methodologies..... 15-33
 - 15.4.2 Computerized Design..... 15-38
 - 15.4.3 Electrical Design 15-38
 - 15.4.4 Foundation, Pole Mounting, and Structural Considerations 15-42
 - 15.4.5 TDOT Foundation Design 15-44
 - 15.4.6 High-Mast Lighting Design 15-45
 - 15.4.7 Underpass Lighting 15-46
 - 15.4.8 TDOT Bridge Lighting Plan 15-47
- 15.5 Materials and Equipment 15-53
 - 15.5.1 Foundations and Mounting..... 15-54
 - 15.5.2 Pole Bases..... 15-54
 - 15.5.3 Poles..... 15-55
 - 15.5.4 Luminaires 15-55
 - 15.5.5 Other Materials and Equipment..... 15-56

TABLE OF CONTENTS (CONT.)

15.6 TDOT Lighting Plans Layouts 15-57

 15.6.1 Plans Preparation 15-57

 15.6.2 Photometric/Preliminary Plans Preparation 15-59

 15.6.3 Photometric/Preliminary Plan Review..... 15-60

 15.6.4 Lighting Computer-Aided Design Drafting Standards 15-60

 15.6.5 Site and Field Reviews..... 15-60

 15.6.6 Photometric Plans and Work Files Submittal..... 15-61

 15.6.7 Lighting Design Checklists 15-62

Equation 7.1 – Change Interval Formula7-36
 Equation 7.2 – Pedestrian Clearance Time7-42
 Equations 7.3 through 7.5 – Pedestrian Change Intervals.....7-42
 Equation 7.6 – Webster’s Cycle Length Estimate7-44
 Equations 7.7 and 7.8 – Apportion All Phases’ Green Intervals.....7-46
 Equations 7.9 and 7.10 – Minimum Green Duration for Queue Clearance7-49
 Equation 7.11 – Passage Time7-51
 Equation 7.12 – Coupling Index7-53
 Equation 9.1 – Pole Height.....9-2
 Equation 15.1 – Roadway Length for Transition Lighting.....15-12
 Equation 15.2 – Luminaire Spacing.....15-17
 Equation 15.3 – Uniformity Ratio.....15-17
 Equation 15.4 – Percentage Voltage Drop for One Luminaire15-41
 Equation 15.5 – Voltage Drop for Each Luminaire.....15-41
 Equation 15.6 – Branch Circuit Breaker Size.....15-42
 Equation 15.7 – Main Circuit Breaker Size15-42
 Equation 15.8 – Length of Foundation.....15-44
 Equation 15.9 – Lateral Movement of Foundation at Ground Line.....15-44

APPENDICES

- Appendix A – Traffic Impact Study Forms
- Appendix B – Traffic Signal Forms
- Appendix C – Traffic Inspection Forms
- Appendix D – Traffic Maintenance Forms
- Appendix E – Roadway and Intersection Lighting Forms/TDOT LED Specifications
- Appendix F – Traffic Operations Standard Drawings List and Current Memorandums
