

School District Provider Registration Frequently Asked Questions

- Q. Are school districts allowed to seek reimbursement for services outside of an IEP to include services such as services provided by a school nurse and/or school based clinics?
- A. This is a decision each Managed Care Organization (MCO) makes. MCOs may contract with providers needed in order to meet network adequacy requirements. (Services provided by RNs or LPNs are not covered directly.)
- Q. Do school districts who bill for medically necessary services often have to go through the appeal process for OT, PT or ST services?
- A. This could vary across MCOs. MCOs may have different prior approval requirements.
