

DUKE UNC

TOBACCO TREATMENT SPECIALIST TRAINING PROGRAM

Comprehensive tobacco treatment training for medical, behavioral, and public health professionals

Skills-based and **clinically relevant training** in a unique blended format of self-paced, online video modules and live, interactive virtual sessions

TOBACCO TREATMENT SPECIALIST TRAINING

The Duke-UNC Comprehensive TTS Program offers a dynamic blend of live, interactive virtual sessions and self-paced online learning.

The curriculum integrates the latest evidence-based research on pharmacotherapy, population-based tobacco control issues, practical guidance for building and sustaining tobacco cessation programs, targeted skill-building in tobacco dependence counseling, and much more.

Our interdisciplinary teaching faculty—presenters, breakout facilitators, and panelists—includes more than 30 experts from Duke University, UNC Chapel Hill, and the North Carolina Division of Public Health. Collectively, they bring decades of experience in tobacco prevention, control, research, treatment, and education.

The Duke-UNC TTS Program is fully accredited by the Council for Tobacco Treatment Training Programs and covers all core competencies for Tobacco Treatment Specialists as defined by the Association for the Treatment of Tobacco Use and Dependence (ATTUD). Completion of the program fulfills the training requirement to pursue national certification as a tobacco treatment specialist.

30 CONTINUING EDUCATION (CE) HOURS

Participants earn 30 continuing education (CE) hours, with accreditation for AMA PRA Category 1, ANCC, ACPE, and IACET CEUs.
