State: Tennessee

B. The method used to collect cost sharing charges for categorically needy individuals:

- X Providers are responsible for collecting the cost sharing charges from individuals.
- The agency reimburses providers the full Medicaid rate for services and collects the cost sharing charges from individuals.

C. The basis for determining whether an individual is unable to pay the charge, and the means by which such an individual is identified to providers, is described below:

The basis for determining that an individual is unable to pay the charge will be self-declaration. If the individual tells the pharmacist he or she is unable to pay, the individual will be assumed to be unable to pay.

State: Tennessee

D. The procedures for implementing and enforcing the exclusions from cost sharing contained in 42 CFR 447.53(b) are described below:

Since enrollees have the opportunity to self-identify and be granted copay exemptions, we do not believe that enforcement will be a major issue. Enrollees will be notified through Member Handbooks and other means of the categories of eligibility and service that are exempt from cost-sharing. Providers will be informed of the exclusions so that they can, in turn, advise their patients. Pharmacies will be educated about copay exclusions. Family planning drugs and supplies have already been identified and programmed at $0 copay.

E. Cumulative maximums on charges:

- State policy does not provide for cumulative maximums

- Cumulative maximums have been established as described below:
