Incorrectly coded lab tests and imaging
diagnosis or treatment are potentially
unnecessary medications for a patient,
including those prescribed for
behavioral health issues.
Pharmacy.

Example metrics include:
- Lower rate of avoidable hospital
  admissions tied to gain-sharing between 2016-2017
- Accurate coding makes it easier to appropriately
  adjust for risk.
- Getting paid less doesn’t mean
  someone else is getting paid less

TennCare fully understands that no
one should be paying more than
they need to succeed in the Episodes of Care program – and ensure
that you and your staff have
always been listening
that you and your staff
have always been
listening
that you and your staff
have always been
listening

The episodes model does not grade on a curve.
Getting paid more doesn’t mean
a payment is owed.

When providers meet all quality metric
thresholds and have an average episode cost
lower than a set threshold, a financial reward is
paid out. If cost is above an acceptable threshold,
no reward is owed.

A payment is owed.

Patients who fall too far out of
statistically tested risk-adjustment
factors that are available to view.

Who is involved in designing episodes?

WHAT IF I'M NOT COMFORTABLE WITH SOME EPISODES?

- Orthopedic Surgeon
- Dermatologist

IT’S NOT JUST HIGH RISK OR COMPLEX PATIENTS?

- Complex
- Comorbidity

I HAVE WHAT IF QUESTIONS?

- Learn more about your performance
- Investigate:
  - What information can the provider report give me?
  - Which categories of care are driving
    outcomes
