Annual Reporting Requirements

Sustaining Recognition

- Practices will demonstrate they continue to align with recognition requirements by submitting data and evidence on these critical aspects of PCMH:
 - Patient-Centered Access & Continuity (AC)
 - Care Coordination & Care Transitions (CC)
 - Care Management & Support (CM)
 - Knowing & Managing Your Patients (KM)
 - Team-Based Care & Practice Organization (TC)
 - Performance Measurement & Quality Improvement (QI)
 - Behavioral Health (BH) (Special Topic)
- Practices will also have the opportunity to submit data and evidence on special topics, such as behavioral health.

Annual Reporting Date

- The annual reporting date is set one month before a practice's recognition anniversary date
- Practices recognized as PCMH 2014 Level 3 renew on the end date of their current recognition and are eligible to sustain Recognition through the annual reporting process
 - All associated practices in a multi-site group typically share the same reporting date
 - The anniversary date is based on the date the first practice earned recognition

Annual Reporting Process: Reporting, Audit and Decision

- Practices will/must:
 - Use Q-PASS to submit data and evidence for their annual reporting
 - Verify core features of the medical home have been sustained
 - Meet the minimum number of requirements for each category
- NCQA:
 - Reviews submission and notifies practices of their sustained recognition status
 - Will randomly select practices for audit to validate attestation and submission
- Practices that do not submit on time or fail to meet other requirements may have their recognition status suspended or revoked. That may include having their recognition status changed to “Not Recognized.”

The Audit: (part of the “succeed” phase)

- A sample of practices will be audited to validate evidence, procedures, attestations and other responses of a Q-PASS submission
- NCQA audits a sample of practices, either by specific criteria or at random
- Audits may be completed by email, teleconference, webinar or other electronic means, or through onsite review
- NCQA notifies the practice of audit findings and the recognition status within 30 days after conclusion of the audit
- Practices have 30 days from the time of audit findings to correct any deficiencies
 - If requirements are met within this period, recognition continues

Shared vs. Site-Specific Evidence

- The organization should go to the Share Credits tab from their Organization Dashboard in Q-PASS to set up their shared site groups
 - If evidence is identified as “shared,” the organization may submit it once on behalf of all or a specified group of practice sites
- If evidence is identified as “site-specific,” the practice must provide site-specific data or evidence
