

Phase II: Preparing for Renewals A Communications Toolkit

Congress has set a date of **April 1, 2023** for the end of the continuous enrollment requirement and the beginning of Medicaid and Childrens Health Insurance Program, or CHIP, renewals. As a result, TennCare will be required by state and federal law to check the eligibility status of every TennCare and CoverKids member. This a yearly process but has not occurred in three years due to the COVID-19 public health emergency (PHE).

Beginning in April, TennCare will review every member's eligibility over a twelve-month period. For each monthly cohort TennCare will use existing data sources to attempt to auto-renew members who continue to meet TennCare eligibility requirements. In most cases, members will be selected for review when their renewal dates naturally fall. For example, if a member (or household) was due to renew in June 2020, their renewal date will now occur on June 2023. If TennCare cannot auto-renew a person's coverage using existing data sources, the member will receive a renewal packet by mail or an email notification to renew on the TennCare Connect portal depending on their selected preference.

TennCare's priority is to prevent gaps in every eligible member's health care coverage. Partner with us today to help Tennesseans by sharing these resources and messages through your various channels.
