Pre-College Students

Pre-college students are those persons who complete some college courses before graduating from high school. Clarifications for the coding of these students are listed below.

Students who took courses from Institution A during high school and then entered Institution B following high school graduation should be coded with a previous registration of "1", a registration type of "1" and a student level of "01". The cumulative hours field will show the work taken during high school if the current institution accepted it as valid transfer work. A transfer institution will not be coded on the Tennessee Higher Education Commission enrollment record. The institution's internal records may show (and probably should show) the institution from which the work was transferred.

Students who took courses from Institution A during high school and then entered Institution A following high school graduation should be coded with a previous registration of “1”, a registration type of “1” and a level of “01”. The cumulative hours field will show the work taken during high school if the current institution accepted it as valid transfer work. A transfer institution will not be coded on the Tennessee Higher Education Commission enrollment record. The institution’s internal records may show (and probably should show) the institution from which the work was transferred.

Students who took enough college courses while in high school to be classified as a student level higher than freshmen when they graduated from high school and registered at Institution A or B, should be coded with the same three codes described above. The student level should be “forced” in as “01” for the first semester, but then can be coded as “02” for their second semester at the institution. The cumulative hours field will show the work taken during high school if the current institution accepted it as valid transfer work. A transfer institution will not be coded on the Tennessee Higher Education Commission enrollment record. The institution’s internal records may show (and probably should show) the institution from which the work was transferred.

Students who took college work while in high school and then registered at Institution A (perhaps in the summer) following high school graduation, but then moved to Institution B some subsequent semester, must be coded as a transfer student because they already would have been coded as a first-time freshman by Institution A.

Duplicate Records

The file submission should only contain one enrollment record per term, per year, per institution, per student. If a duplicate record is found an error will be generated.

Date of Birth for CEU

Please remember that “NR” should not be used on year of birth for students taking CEUs at one location and regular credit at another location.

Student Level

A student can have only one level. Student levels other than “40” should be used for records of students who are taking credit type “6” at one location and regular type credit at another location.

Optional Reporting of Continuing Education Units

If continuing education units are reported in the enrollment reporting system, the following guidelines apply. If a student is enrolled both in continuing education activities and also in other types of credit, the guidelines contained in the data element dictionary apply for reporting that record. If a student is enrolled only in continuing education, the data elements listed below should be reported in the column locations found in the record format table. For CEUs, date of birth, previous registration, transfer institution, and cumulative credits earned will not be edited.

CEU Data Elements: Institution Code, Location Code, Student ID, Gender, Date of Birth, Race, Permanent Address, Resident Status, Citizenship, Registration Type (use code 6), Term, Year, Student Level (use code 40), Credit Type 1 (use code 6), Credit Hours 1(# CEUs), Major Field (use “N”)

Report of Graduates

The Annual Report of Graduates consists of information on each student who completed academic programs during the 2025-2026 year. The collection is defined as all the academic terms Summer 2025 term, Fall 2025 term, and Spring 2026 term.

File Naming Convention

Each file submitted should follow the naming convention detailed below and be a csv file. For enrollment, course level, and ad-hoc files, the file name should contain the system name abbreviation, term and year of the data being submitted, and the file type code. For the completions file, replace the term and year with the academic year of the data being submitted.

The file will not be processed if the file's name is not formatted correctly or if the file extension is not csv.
