# SCHOOL PERFORMANCE FRAMEWORK – FINAL READING

- We began the process of refreshing our school performance framework in March 2022.
- Today, the framework in front of you is for **final read**.
- This framework, once adopted, will serve as an appendix to each school's charter agreement and will be what schools are held accountable, effective immediately.
- Thank you to all stakeholders who took part in this refresh process.

# STUDENT OUTCOMES ADJUSTMENTS

- In the last few months, there was uncertainty regarding implementation of the state's accountability model.
- In October - the framework was approved on final read except for the "Student Outcomes" section that directly aligns to the state accountability model.
- This section of the framework has been updated to be:
  - Flexible, yet aligned
  - Incorporate a concrete contingency plan should any pause or changes happen again

# STUDENT OUTCOMES ADJUSTMENTS

- The contingency plan if letter grades are paused is:
  - Schools will be held accountable to their chronic absenteeism rates and ELPA data in alignment with the thresholds within the state’s accountability protocol at 5% each within the student outcomes section, totaling 10%.
  - The remainder of the weight of the student outcomes section will be redistribute across the rest of the academic section of the framework.
