

2021 Update to the TennCare Quality Strategy

Wednesday, May 5, 2021

From March 29 through April 12, 2021, the Division of TennCare held a public notice and comment period on the agency's draft update to the TennCare Quality Strategy. Members of the public were invited to offer feedback on the draft document, and comments received were reviewed and considered before the document was finalized.

The Quality Strategy is required by federal regulation (42 C.F.R. Part 438, subpart E) and is used to assess and improve the quality of managed care services offered within the state. Today, TennCare submitted the finalized version of its 2021 update to the Quality Strategy to the Centers for Medicare and Medicaid Services (CMS).

The finalized version of the document may be viewed online at <https://www.tn.gov/content/dam/tn/tenncare/documents2/2021UpdateQualityImprovementStrategy.pdf>.
